Bookkeeping is not only a performance measurement for the owners of a company, it is part and parcel of every running business. The goal is that companies can track their expenses to ensure effective financial management. Not only this, but step-by-step deployment of the accounting cycle also enables the companies to provide better insights to the stakeholders, and potential investors, and quantitative information on monetary assets to the state institutions for audits. Also, in the UAE and Dubai, it is best practice for any business to ensure compliance with universal accounting standards for higher transparency and accuracy of financial records.

There are several banks that offer some interest rates on your cash. But this little profit comes with charges when you don't maintain a minimum balance in the account. Banks charge some fees for non-maintenance of the minimum balance in the account. Not all banks charge fees, there are few banks that provide Zero Balance accounts in UAE.
